Full stack developer who designs, builds and operates whole software products: multi-tenant SaaS, financial ERPs, real-time platforms and mobile apps. Three years across Alpha Media, SparkTech Agency and CodeMines, the studio I co-founded: 1,660 commits, 17 products in production, 5 apps on the App Store and Play Store. TypeScript end to end.

## EXPERIENCE

|                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Jul 2026 – present<br>Dhaka                                  | <b>Co-founder &amp; Product Engineer · CodeMines</b> <ul style="list-style-type: none"><li>Architected a multi-tenant retail ERP/POS SaaS (NestJS 11, Prisma 7, PostgreSQL 16, Redis): tenant isolation enforced by a Prisma extension, permission-based guards, Argon2id, refresh-token family revocation, e2e tests against a real database.</li><li>Built a wholesale-garments ERP with real accounting semantics: integer money value object, FIFO lot costing with landed cost, double-entry ledger, append-only history, per-shipment FX.</li><li>Backend lead on MessBuddy (API, web, mobile, super-admin) with operational runbooks shipped as GitHub Actions.</li></ul>               |
| Jun 2025 – Jun 2026<br>Dhaka                                 | <b>Full Stack Developer · SparkTech Agency</b> <ul style="list-style-type: none"><li>Shipped four React Native apps through App Store review (Momentum, Hop Across America, HRlynx, ChatterBee) and FaceSculpt AI (real-time on-device face detection) to the Play Store.</li><li>Built TermSheetGenie (VC modelling SaaS: three-phase simulation engine, five-role access), Berzerker Furrey Comics (Next.js + NestJS + Stripe storefront), MealBox and JobsiteX (marketplace with Stripe, BullMQ, Socket.IO).</li><li>JWT/OAuth2 authentication with role-based access control; event-driven back ends on Redis and BullMQ; REST APIs with webhooks, retries and idempotency keys.</li></ul> |
| Jun 2023 – Feb 2024<br>Remote · Dubai-based<br>IPTV business | <b>Full Stack Developer (contract) · Alpha Media</b> <ul style="list-style-type: none"><li>Built the IPTV Business Management System: accounting, subscriptions, customer records and reporting (React, TanStack Query, Recharts; Express, TypeScript, MongoDB, Zod, JWT).</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                           |

## SELECTED PRODUCTS

- Retail ERP / POS SaaS:** multi-tenant, NestJS + Prisma + PostgreSQL, ORM-level tenant isolation (2026)
- Wholesale Garments ERP:** integer money, FIFO costing, double-entry ledger (2026)
- TermSheetGenie:** VC modelling SaaS with a three-phase simulation engine (2026)
- Momentum · HRlynx · ChatterBee · Hop Across America:** React Native apps on the App Store (2025)

## SKILLS

|                |                                                                                        |
|----------------|----------------------------------------------------------------------------------------|
| Front end      | Next.js, React, TypeScript, Tailwind CSS, React Native, Expo                           |
| Back end       | NestJS, Node.js, Express, REST, JWT / Passport, Zod, Socket.IO, BullMQ, Stripe, OpenAI |
| Data           | PostgreSQL, Prisma, MongoDB, Redis                                                     |
| Infrastructure | Docker, nginx, VPS, GitHub Actions, Vercel, AWS S3, Cloudflare                         |

## EDUCATION

|                           |                                                                                                          |
|---------------------------|----------------------------------------------------------------------------------------------------------|
| 2026 – 2030<br>(expected) | <b>BSc in Computer Science and Engineering</b> , Bangladesh University of Business and Technology (BUBT) |
| 2021 – 2026               | <b>Diploma in Computer Science and Technology</b> , Dhaka Polytechnic Institute                          |
