Product engineer who designs, builds and operates whole software products — multi-tenant SaaS, financial ERPs, real-time platforms and mobile apps. Three years of shipping across Alpha Media, SparkTech Agency and CodeMines, the studio I co-founded: 1,660 commits across 81 repositories, 15 products in production, 5 apps on the App Store and Play Store. TypeScript end to end.

EXPERIENCE

Jul 2026 — present
Dhaka

Co-founder & Product Engineer · CodeMines

- Formed the studio with former colleagues immediately after SparkTech; I own architecture, back end and deployment across our products.
- Architected and built a multi-tenant retail ERP/POS SaaS (NestJS 11, Prisma 7, PostgreSQL 16, Redis): tenant isolation enforced by a Prisma extension, permission-based guards, Argon2id, refresh-token family revocation, e2e tests against a real database.
- Built a wholesale-garments ERP with real accounting semantics: integer money value object, FIFO lot costing with landed cost, double-entry ledger, append-only history, per-shipment FX.
- Backend lead on MessBuddy (API, web, mobile, super-admin) with operational runbooks shipped as GitHub Actions.
- Built codemines.studio (Next.js + MongoDB CMS). Deployment end to end: Docker images to GHCR, SSH deploys to VPS behind nginx, GitHub Actions CI.

Jun 2024 — Jun 2026
Dhaka

Full Stack Developer · SparkTech Agency

- Architected production applications on NestJS, React Native and AWS, including S3/CDN video delivery.
- Shipped four React Native apps through App Store review — Momentum, Hop Across America, HRlynx, ChatterBee — and FaceSculpt AI (real-time on-device face detection) to the Play Store.

- Built TermSheetGenie (VC modelling SaaS: three-phase simulation engine, five-role access), Berzerker Furrey Comics (Next.js + NestJS + Stripe storefront), MealBox and JobsiteX (marketplace with Stripe, BullMQ, Socket.IO).
- JWT/OAuth2 authentication with role-based access control; event-driven back ends on Redis and BullMQ; REST APIs with webhook integrations, retries and idempotency keys.

Jun 2023 — Feb 2024
IPTV business ·
salaried contract

Full Stack Developer (contract) · Alpha Media

- Maintained the company's existing systems and built new ones alongside them.
- Built the IPTV Business Management System: accounting, subscriptions, customer records and reporting for an IPTV provider (React, TanStack Query, Recharts; Express, TypeScript, MongoDB, Zod, JWT).

2023 — 2024
Remote

Full-stack developer · Independent

- Trade People — tradespeople marketplace (React, Express, MongoDB).
- Feni Blood Line — verified-donor platform serving Feni District since 2023; bilingual, live emergency requests.
- MediMart — healthcare e-commerce (Next.js, Express, MongoDB).

SELECTED PRODUCTS

Retail ERP / POS SaaS — SaaS platform, 2026
TermSheetGenie — Web platform, 2026
MealBox — E-commerce platform, 2025

Wholesale Garments ERP — ERP · Finance, 2026
Feni Blood Line — Web platform, 2026
Momentum — Mobile app, 2025

SKILLS

Front end	Next.js, React, TypeScript, Tailwind CSS, React Native, Expo
Back end	NestJS, Node.js, Express, REST, JWT / Passport, Zod, Socket.IO, BullMQ, Stripe, OpenAI
Data	PostgreSQL, Prisma, MongoDB, Redis
Infrastructure	Docker, nginx, VPS, GitHub Actions, Vercel, AWS S3, Cloudflare
Practice	Multi-tenant architecture, financial data modelling, API design, e2e testing, AI-assisted engineering

LANGUAGES

Bangla (native) · English (fluent) · Hindi (conversational) · German (A2, working toward B2)

EDUCATION

2026 — 2030 (expected)	BSc in Computer Science and Engineering — Bangladesh University of Business and Technology (BUBT)
Completed May 2026	Diploma in Computer Science and Technology — Dhaka Polytechnic Institute
2021	Secondary School Certificate (Science) — GPA 5.00 / 5.00 — Thakurgaon Govt. Boys' High School
2025	Advanced Web Development, Level 2 — Programming Hero
2022	Complete Web Development — Programming Hero
