Product engineer who designs, builds and operates whole software products — multi-tenant SaaS, financial ERPs, real-time platforms and mobile apps. Two years at CodeMines: 1,660 commits across 81 repositories, 15 products in production, 5 apps on the App Store and Play Store. TypeScript end to end.

EXPERIENCE

2025 — present
Dhaka

Product Engineer · CodeMines

- Architected and built a multi-tenant retail ERP/POS SaaS (NestJS 11, Prisma 7, PostgreSQL 16, Redis): tenant isolation enforced by a Prisma extension, permission-based guards, Argon2id, refresh-token family revocation, e2e tests against a real database.
- Built a wholesale-garments ERP with real accounting semantics: integer money value object, FIFO lot costing with landed cost, double-entry ledger, append-only history, per-shipment FX.
- Backend lead on MessBuddy (API, web, mobile, super-admin) and JobsiteX (marketplace with Stripe, BullMQ, Socket.IO); shipped operational runbooks as GitHub Actions.
- Shipped four React Native apps through App Store review — Momentum, Hop Across America, HRlynx, ChatterBee — and FaceSculpt AI (real-time on-device face detection) to the Play Store.
- Built TermSheetGenie (VC modelling SaaS with a three-phase simulation engine and five-role access), Berzerker Furrey Comics (Next.js + NestJS + Stripe storefront) and MealBox.
- Own deployment end to end: Docker images to GHCR, SSH deploys to VPS behind nginx, GitHub Actions CI. Built codemines.studio (Next.js + MongoDB CMS).

2024 — 2025
Dhaka · 8+ months

Full Stack Developer · SparkTech Agency

- Architected production applications on NestJS, React Native and AWS, including S3/CDN video delivery.

- Implemented JWT/OAuth2 authentication with role-based access control.
- Built event-driven back ends on Redis and BullMQ for background processing and job queues.
- Designed REST APIs with webhook integrations, retry mechanisms and idempotency keys; tuned performance with caching, CDN and query optimisation.

2024
Remote · IPTV business

Full Stack Developer (contract) · Alpha Media

- Maintained the company's existing systems and built new ones on a salaried contract.
- Built the IPTV Business Management System: accounting, subscriptions, customer records and reporting for an IPTV provider (React, TanStack Query, Recharts; Express, TypeScript, MongoDB, Zod, JWT).

2023 — 2024
Remote

Full-stack developer · Independent

- Trade People — tradespeople marketplace (React, Express, MongoDB).
- Feni Blood Line — verified-donor platform serving Feni District since 2023; bilingual, live emergency requests.
- MediMart — healthcare e-commerce (Next.js, Express, MongoDB).

SELECTED PRODUCTS

Retail ERP / POS SaaS — SaaS platform, 2026

Wholesale Garments ERP — ERP · Finance, 2026

TermSheetGenie — Web platform, 2026

Feni Blood Line — Web platform, 2026

MealBox — E-commerce platform, 2025

Momentum — Mobile app, 2025

SKILLS

Front end	Next.js, React, TypeScript, Tailwind CSS, React Native, Expo
Back end	NestJS, Node.js, Express, REST, JWT / Passport, Zod, Socket.IO, BullMQ, Stripe, OpenAI
Data	PostgreSQL, Prisma, MongoDB, Redis
Infrastructure	Docker, nginx, VPS, GitHub Actions, Vercel, AWS S3, Cloudflare
Practice	Multi-tenant architecture, financial data modelling, API design, e2e testing, AI-assisted engineering
